

Driving Possibilities™

Driving Possibilities is a \$110 million career readiness and community engagement initiative of the Toyota USA Foundation. It's a new way for Toyota to partner with educators, nonprofits, other industries and communities to address roadblocks to learning, all while preparing youth for the future of work.

Why We're Doing it

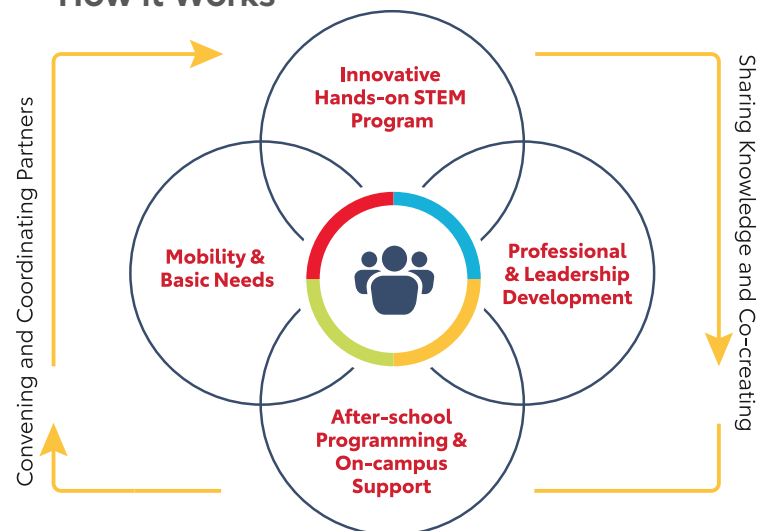

Toyota believes *all kids* deserve an equal opportunity to access rewarding careers in high-growth industries—and the future of companies like ours depends on it.

What We're Driving Towards

-  Increasing excitement and readiness for STEM careers
-  Coordinating community-based services to fuel innovative solutions
-  Decreasing barriers that impact success (e.g., mobility issues, food insecurity)
-  Engaging businesses for mentoring, training and career readiness efforts

How it Works

Creating Opportunity Across the Education to Career Continuum

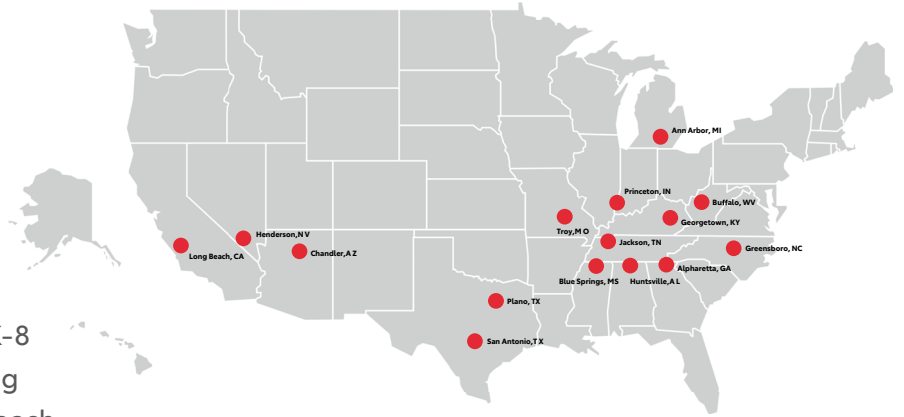

Over the next decade, nearly **3.5M** manufacturing and STEM-related jobs will be available and **2M** are expected to go unfilled due to the skills gap.

Where We're Investing

Driving Possibilities focuses on Toyota's U.S. operational communities. Inspired by our partnership with the Dallas Independent School District in Texas to develop a new PreK-8 STEM school, the effort builds on longstanding partnerships with nonprofits with a new approach to community engagement.

New Possibilities Launched in Indiana, Alabama, Michigan, Kentucky, Arizona, North Carolina, Mississippi and Georgia

Driving Possibilities reaches a diverse, underserved population via an innovative project-based initiative that focuses on STEM curriculum, professional teacher development and community-based service coordination—all informed by the community and created together with Toyota.

Projected reach of over 39,000 students
over the next 5 years in **62 schools** throughout TX, IN,
AL, MI, KY, AZ, NC, MS and GA with a **\$61M commitment**

"As a child myself coming from poverty, I realize the importance of having an entire village helping to reach every single child in every single corner of the community. You [Toyota] have made this very possible for us, and I couldn't be more thankful."

Superintendent Demetrus Liggins, Fayette County Schools

Together we can do more.
